

Paris and Toulouse, September 1st, 2015

GENTICEL TO MEET INVESTORS

Gentical (Euronext Paris & Brussels: FR00011790542 – GTCL), a clinical-stage biotechnology company and developer of innovative immunotherapies to prevent cancers caused by the human papillomavirus (HPV), today announced its investor meeting programs for the coming months. These events will be an opportunity for Gentical management to discuss recent company news, strategy and the latest developments of Gentical's pipeline.

- Large & Midcap Event, taking place in Paris – Palais Brogniart, on October 7 & 8, 2015
- KBC Biotech & Healthcare Seminar taking place in New York on November 10, 2015
- Salon Actionaria, taking place in Paris – Palais des congrès on November 20 & 21, 2015
- JP Morgan Healthcare Conference taking place in San Francisco, from January 11 to 15, 2016

Results for the first half of 2015 will be published on September 21, 2015 (after markets close).

About Gentical

Aiming to solve a public health issue.

Among the 300 million women around the world currently infected with HPV, 500,000 new cases of cervical cancer are identified each year and 275,000 women succumb to the disease. 70% of cervical cancer cases are caused by 2 HPV types and Gentical aims to eliminate them at an early stage with GTL001 (known in Europe as ProCervix), its first-in-class immunotherapeutic vaccine candidate. The company has already completed patient recruitment for the phase 2 clinical trial of GTL001 in Europe.

Offering a promising technological platform.

Gentical's versatile platform, Vaxiclase, is ideally suited for the development of immunotherapies against multiple infectious or cancerous diseases. Gentical's second candidate, GTL002, is a multivalent HPV therapeutic vaccine designed with Vaxiclase. It targets the six most relevant HPV types in terms of global epidemiology and is currently in preclinical development.

Focusing on value creation.

Respectively, the peak sales potentials of GTL001 and GTL002 are estimated at over €1 billion and €2 billion per year. In addition to this attractive HPV product pipeline, Gentical's versatile technological platform, Vaxiclase, has already generated significant interest in the pharmaceutical industry, as illustrated by the partnership agreement signed in 2015 with the Serum Institute of India Ltd. (SII), the world's largest producer of vaccine doses. This partnership could generate up to \$57 million in revenues for Gentical, before royalties on sales. It will enable SII to develop acellular multivalent combination vaccines against a variety of infectious diseases, including whooping cough.
